QUALIFICATIONS

Mr. Herbst is a Professional Engineer with over 32 years experience in project management, project engineering, and general management of plant operations and maintenance, as well as, piping, mechanical and electrical systems projects.

REPRESENTATIVE EXPERIENCE

Power Generation: Mr. Herbst directed the economic, reliable and safe operation of a five unit, 500 MW, coal, oil & natural gas fired, electric generating facility, including all administrative, engineering, operations and maintenance functions. Prior to his position as Plant Manager he held supervisory positions in overhaul planning and plant maintenance, as well as, support engineering services.

Project Management: Mr. Herbst has been involved in project management throughout his career. As a Site Manager with Day & Zimmermann NPS he was responsible for managing the company's Alliance Maintenance Contract at the Lovett and Bowline Generating Stations. The work completed under this contract included routine maintenance activities, planned outages and forced shutdown repairs. As Vice President with Hauser Bros., Inc., Mr. Herbst was responsible for project management and engineering support of power and process projects. These projects included repair, modification and replacement of major power and process plant components.

Project Engineering: Mr. Herbst has providing project engineering services in several capacities for: a major engineering & construction company, an electric and gas utility, a mechanical contractor, and engineering consultants.
